

Pre-Purchase Examination Reporting

We know that pre-purchase examinations can be very stressful for the buyer, vendor and veterinarian involved. Our dedicated equine team is able to support you and help ease some of the stress of this type of examination.

We provide confidence and peace of mind

At VET.CT, we will evaluate and report on radiographs, CT and MRI images that are conducted as part of your pre-purchase examination. All pre-purchase examination images sent to us are **double read by two experienced equine radiologists**, in order to give you the best possible service, support and reassurance.

We have first hand experience of the challenges of interpreting images at pre-purchase examination and the difficulties assessing the risk of minor findings in an otherwise sound horse. Our team are well-versed in assessing pre-purchase images from horses of all disciplines and types, and have a wealth of experience in correlating the findings with the clinical picture and assessing the potential risk for athletic function. Our reports are constructive and practical, **laying out the risks as clearly as possible** for you and your client, to ensure confidence and peace of mind.

Our imaging report can be attached as an addendum to or provided alongside your pre-purchase examination documentation for **legal security**, and to patient records for **clinical reassurance**.

Working together on pre-purchase examinations

Our equine diagnostic imaging specialists have a wealth of clinical experience with a wide range of horses and disciplines, from **elite show jumping and dressage to racing, endurance, Western and pleasure horses at all levels**. We will ensure that our comments and conclusions are clinically relevant, advise on risk levels, and relate to the intended use of the horse.

The more history and detail you give us, the more we can help you. The questions we ask when you submit your pre-purchase examination images are specifically tailored to provide us with information that will help us contextualise the images, and allow us to give you the most relevant advice, but the more information and background you provide, the better. We are happy to help answer specific queries, to evaluate selected anatomical areas or entire screening evaluations.

How long will I wait for a report on my pre-purchase images?

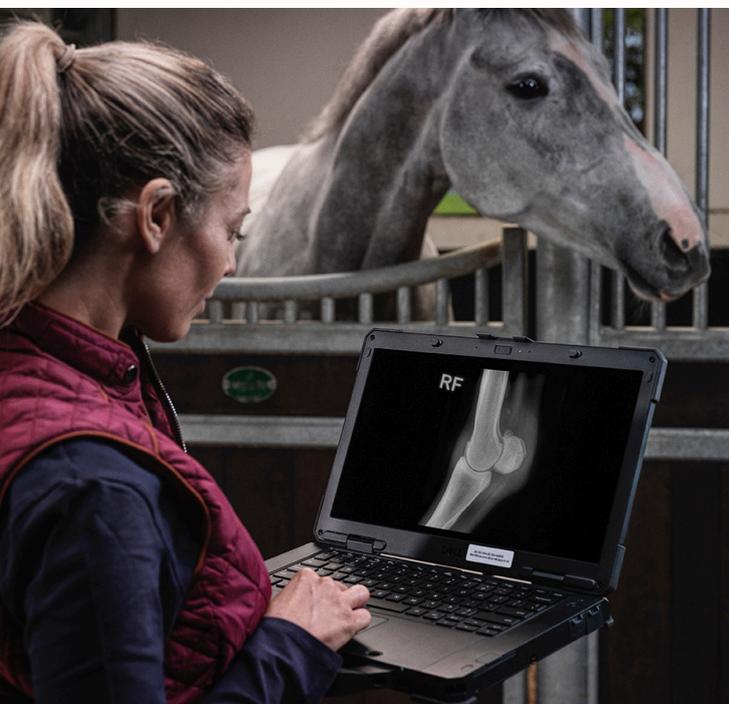

We aim for a rapid turnaround time. Please select priority if there is a time constraint but do take into account that it may take up to **two working days** for the case to be double read in order to give you the best possible reassurance.
